

Murdishaw, Runcorn

Equans completes regeneration and decarbonisation of 132 Runcorn homes.

Following long-term collaboration with Onward, we supported their bid for SHDF Wave 1. The Murdishaw regeneration and decarbonisation scheme in Runcorn vastly improved the energy performance of 132 properties with 528 retrofit measures installed.

More than £6m of investment has been made into the Murdishaw estate. Equans' Refurbishment team has been working with Onward in Murdishaw since 2021 on this scheme, undertaking property and structural surveys, gathering retrofit data and carrying out energy assessments from the beginning, ensuring the works were completed to the required PAS2030/2035 specification.

Across the entirety of the Murdishaw scheme, 172 tonnes of CO₂ will be saved per year, or 5,148 tonnes over the lifetime of the measures installed.
