

# Southern Water

**Equans provides Hard FM, Cleaning, Security, Grounds and Energy services to over 4,000 Southern Water locations, including offices, water treatment works, wastewater treatment works, pumping stations and reservoirs.**

## Background

Southern Water is the private utility company responsible for the public wastewater collection and treatment in Hampshire, the Isle of Wight, West Sussex, East Sussex and Kent, and for the public water supply and distribution in approximately half of this area.

In August 2021, Australian financial services company Macquarie Group bought a majority stake in Southern Water. Southern Water supplies an area totalling 4,450 sq. km. and serves 2.26 million customers.

The company supplies drinking water to roughly 1.1 million properties through its 91 water treatment works and 13,870 kilometres of water mains. Wastewater is treated by the company's network of 365 wastewater treatment works and 39,594 kilometres of sewers.

## Relationship development

Equans provide Reactive & Fabric PPM services and Hard FM to thousands of Southern Water Service lines include Grounds Maintenance, Fire and Security, Catering, Pest Control, Manned Guarding, Cleaning, Mechanical and Electrical Planned Preventative Maintenance, Reactive response Projects.

The contract runs until 2026 with a 3 year option.
